

## Removing Automatic Hyphenation in Publisher

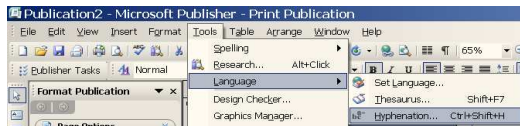

- Do you sometimes find that hyphens appear where you don't want them to in text boxes and you can't delete them?

- This is because automatic Hyphenation is switched on by default for Text boxes, and so hyphens are inserted wherever words are cut off at the edge of the box.

- To disable this feature go to Tools / Language / Hyphenation

- And then uncheck the Automatically hyphenate this story box
